## Homework 4

Math 262
Write your solutions to the following problems and turn them in to the homework mailbox (RMS level 3 , near the fireplace) by $4: 00 \mathrm{pm}$ on Wednesday, September 25.

## Book Problems

- Section 1.4 \#76 (page 42)
- Section 1.5 \#81, 88, 91, 93 (pages 47-50)

Note: \#88 has two possible answers

- Section 1.6 \#101a (page 56)

## Additional Problems

1. Show that $\binom{n}{k}=\binom{n-1}{k-1}+\binom{n-1}{k}$, where $1 \leq k \leq n$.
2. A total of $n$ independent tosses of a coin that lands on heads with probability $p$ are made. How large need $n$ be so that the probability of obtaining at least one head is at least $\frac{1}{2}$ ? (The answer depends on $p$, of course.)
